

Which member confidence to pool? Each point is one group on one dataset (masks and references are matched within, not across, estimators)

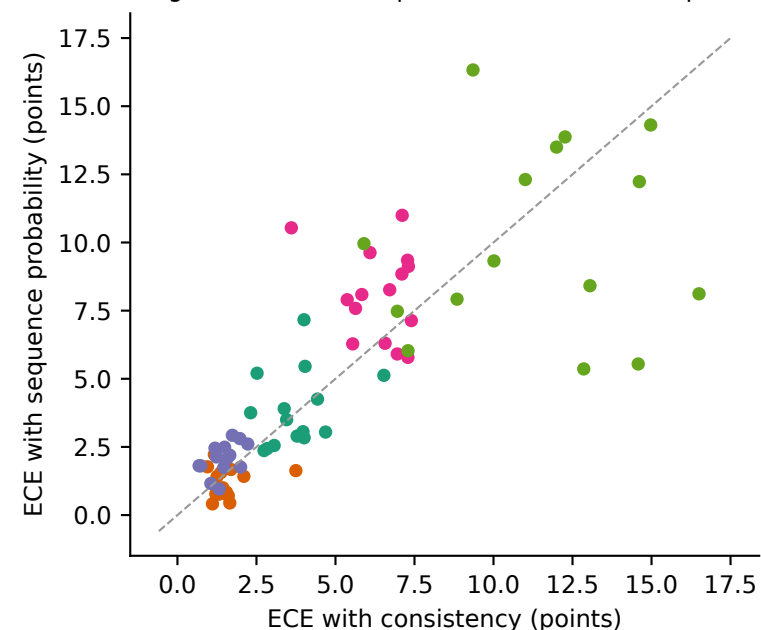

Solo reference ECE: sequence better in 0% of panels

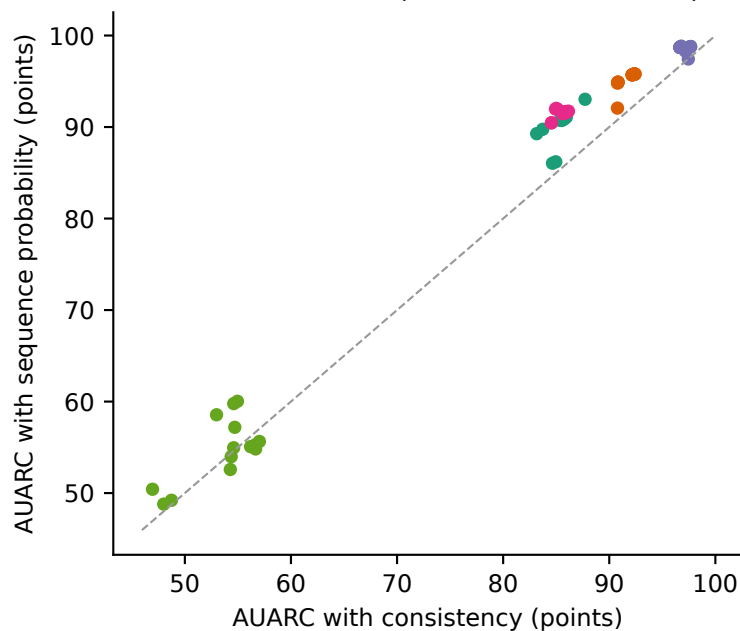

Mean ECE: sequence better in 27% of panels

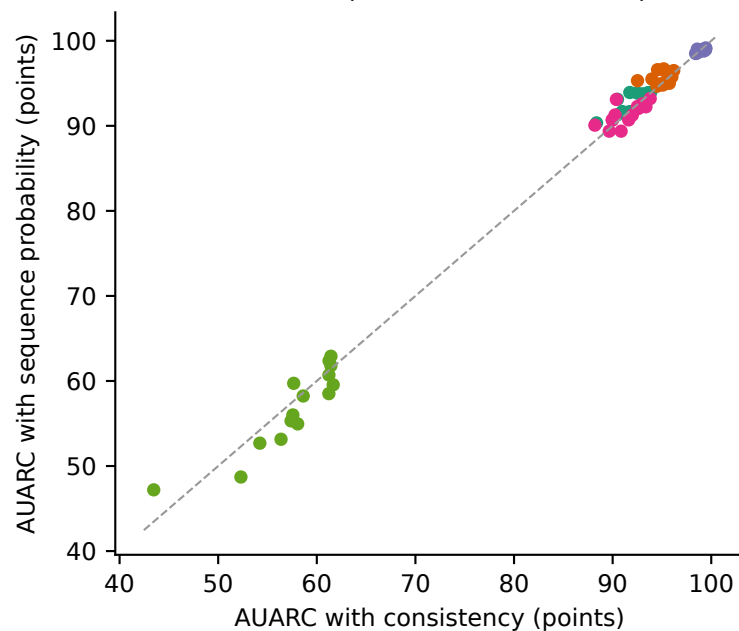

Weighted BLP ECE: sequence better in 47% of panels

Solo reference AUARC: sequence better in 89% of panels

Mean AUARC: sequence better in 49% of panels

Weighted BLP AUARC: sequence better in 59% of panels
